ABSTRACT

In 1974 Kentucky's 285 public high schools produced 41,522 graduates, or 68.5% of the ninth grade enrollment in 1970-71. The 46 non-public high schools graduated 3,297 students, or 77% of the 1971 ninth graders. From all high schools 38.3% were reported as enrolling in college. Compared to the class of 1962, the increase in the number of graduates is 17,027 or 61.6%. Directly attributable to increased holding power is 6,668 or one in ten 1974 graduates. Data sources are principals' annual reports, superintendents' end of year reports, and the "Biennial Report of the State Superintendent of Public Instruction". Three tables in Part I of this report show the number and whereabouts of 1974 graduates of public and non-public high schools, separately and combined. Also included is a comprehensive overview by county and region of total ninth grade enrollment, graduates, and total graduates reported enrolling in college. Part II measures holding power with a summary of ten graduating classes of public, non-public and combined high schools from 1965 to 1974. Data includes survival rates from ninth grade and whereabouts of graduates. A final summary consolidates public and non-public schools in two tables showing relative county standings in holding power, graduates, and survival rate of ninth grade to college. (DS)

1975

FOREWORD

Viewed in historical perspective the Kentucky high school today reveals significant growth and strong evidence of an emerging readiness of all schools to serve all the needs of all the youth in the years ahead. The purpose of the nineteenth annual report on holding power and whereabouts of Kentucky high school graduates is to document selected aspects of this change. The annual replication of this report has helped to provide objective measures of the growth and development of the secondary school. It is one of many tangible evidences of the contribution of a sound Foundation Program for Kentucky schools.

The comparative analysis of the data relating to the class of 1974 in terms of the class of 1962 reveals significant improvements in the twelve year span. Generally increases in holding power continue to reflect more effective school organization, quality staffing, and improved educational opportunity. It is a tribute to local leadership that increased holding power has been the mainstay of growth of school enrollment and graduates during the period of declining births. The accomodation of record elementary and secondary enrollment during the decade of the Sixties is only a part of the true measure of gains in education under the State's Foundation Program.

It is hoped that this bulletin will be helpful to persons interested in interpreting Kentucky education's many facets of growth and in particular those individuals who are responsible for the development of educational policy and practice. A truly eventful period of advancement lies before the profession and the public as Kentucky makes preparation to join in the nation's Bicentennial Anniversary in 1976.

Lyman V. Ginger

ACKNOWLEDGMENTS

A generous amount of credit for this nineteenth report on a continuing series on holding power and whereabouts of graduates should go to the high school principals of Kentucky and the several divisions in the Department of Education that collect and report pupil data. Special recognition is due the division of Computer Services for the continued development of an instant data retrieval system and the sharing of early preliminary reports from the school districts. The problems of Statistical Services in providing accurate and complete data for this report on graduates were multiplied as a result of aggregating school data and reporting by school district only.

Special acknowledgment is also extended to the Division of Pupil Personnel Attendance and Accounting and the Division of Statistical Services. Reports from these divisions each year make possible the consolidation and verification of much common pupil data submitted in separate reports and on different reporting schedules.

Finally special thanks go to Research office staff members--Isabel Triplett and Brenda O'Brien who assumed major responsibility for collecting and verifying data, and organizing and typing the report.

INTRODUCTION

The nineteenth annual report in the series of bulletins on Holding Power and Graduates of Kentucky High Schools starting in 1956 has the enlarged purpose each year of providing an overview of a decade of growth (1962-1974) in addition to presenting the usual analysis of data for the current graduating class of 1974.

In retrospect, the 1962-63 school year marked the beginning of the third year of a new era in public education in Kentucky with a record-breaking appropriation made possible by revenue from the enactment of a sales tax. While there are many dimensions of a comprehensive state-local-federal financing plan for providing full educational opportunity, it is generally agreed that the ultimate criterion of adequacy of any plan is the quality and quantity of educational outcomes made possible through its operation. The Class of 1974 is the third graduating class having full advantage of a twelve year program under a fully-financed Foundation Program.

Using the third year of the decade of the Sixties as base-line data and the graduate output for current year (1974), following comparisons point up for selected measures the twelve-year growth and expansion of the high school program in Kentucky.

The increase in the number of all high school graduates for the Class of 1974 as compared to the Class of 1962 is 17,027 or 61.6 per cent.

The increase in births in the corresponding years 1956 and 1957 (Class of 1974) as compared to 1944 and 1945 (Class of 1962) was 13,999 or 23.1 per cent.

The percentage of all graduates in 1962 in terms of total ninth grade enrollment four years earlier was 61.4 per cent. Comparable holding power for the Class of 1974 is 69.0 per cent.

The increase of graduates in the Class of 1974 over the Class of 1962 directly attributed to increased holding power, is 6,668 or approximately one of ten graduates in the class of 1974.

A comparison of Whereabouts of Graduates of all Kentucky high schools, 1962 and 1974, reveals the following changes in a twelve-year span in the standard categories for which principals provide data:[1]

	1962	1974	Change	% Change
College or University	10,274	17,159	+ 6,885	+ 67.0
Trade, Technical, or Nursing School	1,486	3,224	+ 917	+ 39.8
Business School 2,307	821			
Sales or Office	3,237			
Farming 6,936	1,208	13,912	+ 6,976	+100.6
Factory or Trade	2,491			
Other Employment Including Military	2,526	1,195	- 1,331	- 52.7
Not Employed or at Home	4,156	2,633	- 1,523	- 36.7
Unknown	1,543	3,991	+ 2,448	+158.7
Other	--	2,705	+ 2,705	--
Total	27,742	44,819	+17,077	+ 61.6

In the Fall of 1962, 12,581 or 45.4 per cent of June graduates were reported entering a formal program of education beyond the high school. Twelve years later, principals reported 20,383 or 45.5 per cent of the 1974 graduates enrolled in a post-secondary program--college or university, trade, technical, nursing school or business school. A graphic portrayal of the growth pattern is shown on the following facing pages.

1. Revision of Principals' Annual Report in 1966 resulted in changes in categories reported on by principals which limit the comparability of items to broad approximations except for "college or university."

Source and Interpretation of Data

There are two primary sources of data on public high school graduates; the principal's annual report and the superintendent's end-of-year report. Statistical data on number of graduates in the principal's report in October may vary from end-of-year enrollment data in the statistical report of the superintendent submitted at the close of the school year on June 30. The data for graduates of public school districts are published in the Biennial Report of the State Superintendent of Public Instruction. The latter report includes graduates of public school districts only whereas this report accounts for all graduates of public and non-public high schools in the state.

A further precaution is necessary in distinguishing between "holding power" as defined in this report and school dropouts. The method of determining retention rates follows the national pattern. In this bulletin series, rates for the ninth grade through high school graduation are based on enrollments in successive grades in successive years of all public and non-public schools. The data at hand limit the base year to the ninth grade. State data are taken from Kentucky High Schools, annual publication prepared by the Bureau of Instruction.

Reporting the Data

Charts 1 and 2 on preceding facing pages portray the rapid growth of secondary education in the Sixties. The Highlights section provides a brief summary of tabular data and comparisons with state and national norms.

Part I presents current data on holding power and graduates of public and non-public schools in Tables 1 thru 3. Trends and related data are shown in Part II. A special section of Part II deals with a comparison of the relationships of the number and size of public school graduating classes in 1961-62 with the current year, 1973-74. A comparable summary is provided for non-public high schools.

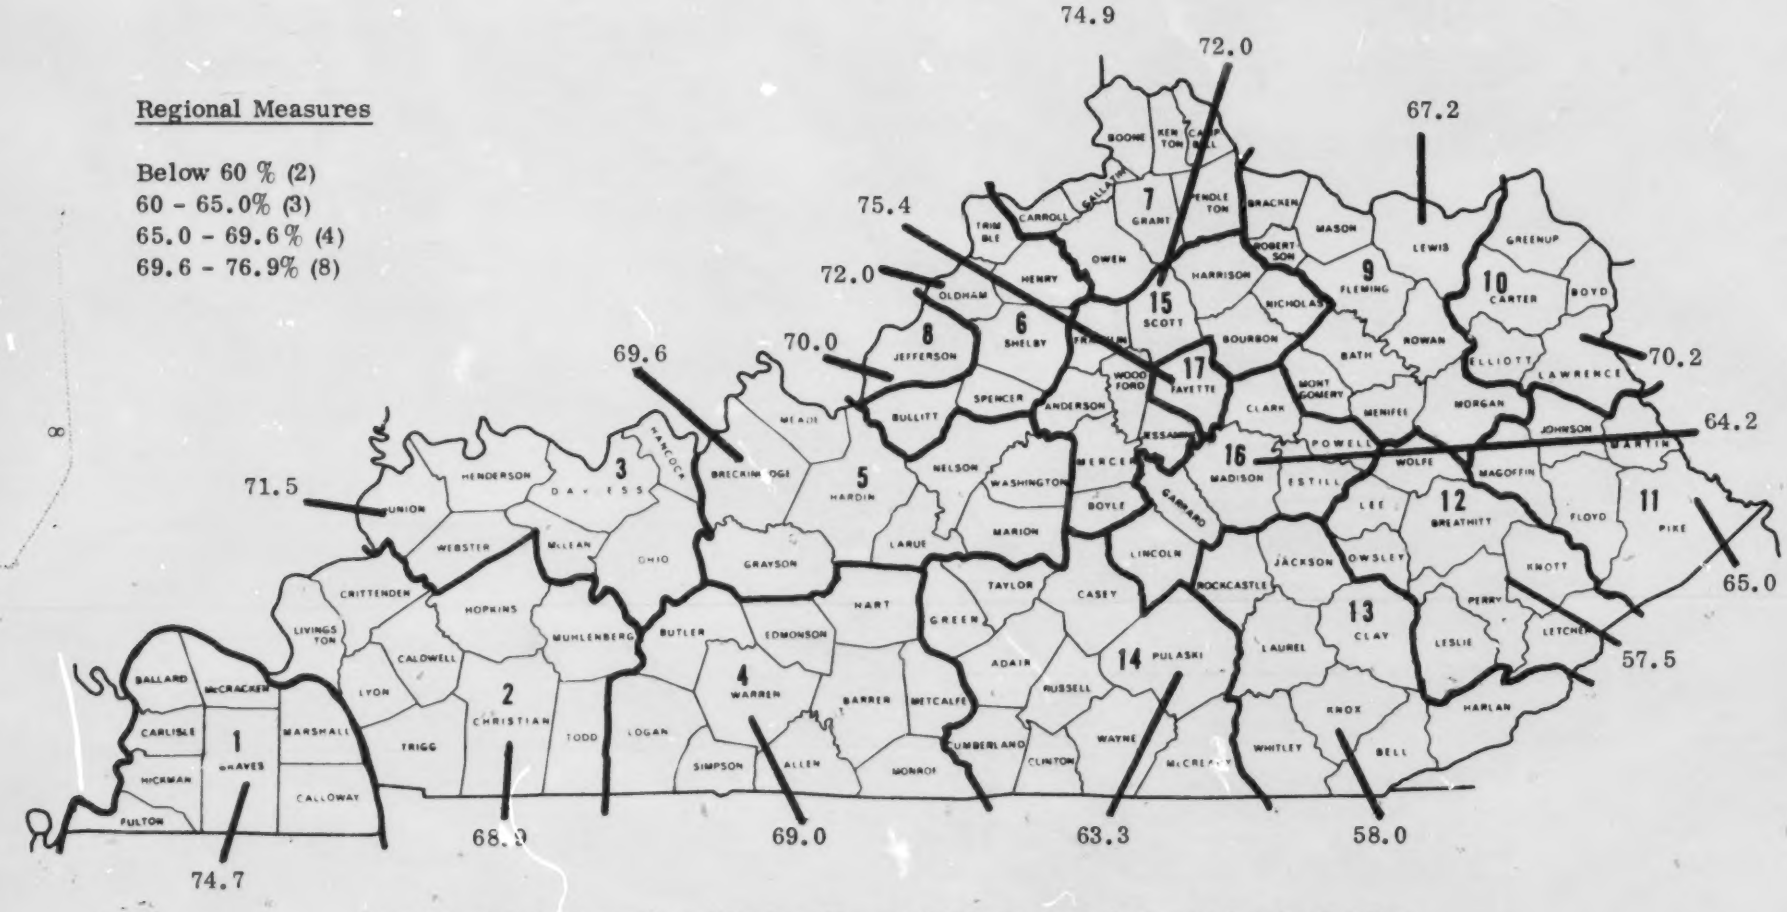
Regional Measure of Holding Power



Map-Chart: Ninth Grade Public Enrollment (1970-71) Completing High School (1974)

HIGHLIGHTS

In 1973-74, from the 289 complete public high schools (including six regional and federal high schools), there were 41,522 graduates, or 68.5 per cent of the total number of 60,641 ninth grade enrollment in 1970-71. Of the total graduates, 20,378 or 49.1 per cent were boys and 21,144 or 50.9 per cent were girls.

From the 46 non-public high schools, there were 3,297 graduates or 77.0 per cent of the total number of 4,297 ninth grade enrollment in 1970-71. Of the total graduates, 1,659 or 49.7 per cent were boys and 1,638 or 50.3 per cent were girls.

From the total public and non-public high schools, there were 44,819 graduates, or 69.0 per cent of the total number of ninth grade pupils enrolled in 1970-71. Of the total graduates, 22,037 or 49.2 per cent were boys and 22,782 or 50.8 per cent were girls.

Of the graduates of public high schools, there were 15,304 or 36.8 per cent reported as enrolling in college or university. Of this number 7,259 or 47.4 per cent were boys and 8,045 or 52.6 per cent were girls.

There were 1,855 graduates, or 56.3 per cent of the total graduates of non-public high schools, reported enrolling in college or university. Of this number, 1,032 or 55.6 per cent were boys and 823 or 44.4 per cent were girls.

From all high schools, there were 17,159 graduates, or 38.3 per cent of the total number of 44,819 graduates, reported enrolling in college or university, Fall 1974.

Reported enrolling in some type of formal education program beyond the high school including trade or special school were: public school graduates, 18,280 or 44.0 per cent of total public graduates; non-public high schools, 2,103 or 63.8 per cent; and for all high schools, 20,383 or 45.5 per cent of total graduates.

The average survival rate per 1,000 ninth grade enrollment (1970-71) for all high schools was: tenth grade, 919, eleventh grade, 817; twelfth grade, 716; and graduates 690.

Sixty-nine (69.0) per cent of the total ninth grade enrollment four years earlier completed high school in 1973-74.

For all Kentucky high schools, 38.3 per cent of all graduates in June, 1974 were reported enrolling in college or university in the Fall of 1974.

For all Kentucky high schools, 264 per 1,000 ninth grade pupils completed high school and enrolled in college or university.

Age of Public High School Graduates

Wide variability in age of public high school graduates in 1962 and earlier years as compared to 1974 has been reduced as shown by the lower and upper extremes of the age distribution for 1962 and 1974.

In 1962, 84.8 per cent of the 23,765 graduates were at ages 17 and 18. Of this number, 49.1 per cent of girls and 38.5 per cent of boys were graduated at age 17. Graduating at age 16 or under were 365 girls (3.0 per cent) and 226 boys (2.0 per cent).

In 1974, ages 17 and 18 were more heavily favored as the normal ages for boys and girls as these brackets climbed to 90.6 per cent--43.7 per cent, age 17 and 47.0 per cent, age 18. The number of graduates at age 16 or under was reduced to 124 boys (.6 per cent) and 241 girls (1.2 per cent) as compared to 1962 with 226 boys (1.9 per cent) and 365 girls (3.0 per cent).

In 1962, 83.5 per cent of boys and 90.9 per cent girls had completed high school by age 18. In 1974, these percentages had increased to 89.0 per cent for boys and 93.9 per cent for girls.

What about the holding power of Kentucky high schools for boys and girls graduating beyond age 18?

In 1962, 1,900 boys or 16.5 per cent of total graduates, continued in school beyong age 18 to graduate. Comparable data reveal that 1,111 girls, or 9.1 per cent of total, remained in school beyond age 18 to graduate.

With higher rates of graduation at 18 and below, comparative data on graduation experience beyond age 18 reveal an increase in number of students over 18 staying in school:

1) Boys--2,208 of 20,161 graduates, 11.0 per cent.
2) Girls--1,278 of 20,877 graduates, 6.1 per cent.

Summary Graduation Experience Beyond Age 18

	Boys				Girls			
	1962		1974		1962		1974	
Age	No.	%	No.	%	No.	%	No.	%

	1,900	16.5	2,208	11.0	1,111	9.1	1,278	6.1

PART I

HOLDING POWER AND GRADUATES

The three basic tables in Part I provide a comprehensive overview of the number and whereabouts of graduates of all Kentucky public and non-public high schools, separately and combined, for the school year 1973-74. The 61,418 ninth grade public and non-public high school students in 1970-71 were enrolled in 348 complete high schools, 40 junior high schools, and 12 incomplete high schools. Of the total number of entering ninth grade students, 44,829 or 69.0 per cent were graduated from 335 complete high schools in 1974. The distribution of all Kentucky high schools in 1971 and 1974 by type of organization and control is shown in the following summary:

Type of Organization	Type of Control									
	County District		Independent District		Private and Parochial		State, Fed. & Regional		Total	
	73-74	70-71	73-74	70-71	73-74	70-71	73-74	70-71	73-74	70-71
Grades 9-12	142	142	28	28	36	43	4	2	210	215
Grades 7-12	47	50	32	30	6	5	1	3	86	88
Grades 10-12	19	20	10	9	0	0	1	1	30	30

Source of Data: State Bulletin Series, Kentucky High Schools, Vol. XXXIX (July, 1971), and Vol. XLII (August, 1974), Kentucky Department of Education.

Table 1-A presents data by school district, county, and region for 41,522 public high school graduates representing 289 high schools in county and independent districts and six special high schools. A further grouping of public school data by 17 educational development districts (EDDs) is shown in Table 1-B.

Comparable analysis and reporting of non-public high school data by county and region are presented in Tables 2-A and 2-B.

Table 4 provides a comprehensive overview by county and region of total ninth grade enrollment, all public and non-public graduates, and total graduates to college as reported by principals to the Bureau of Instruction. A special feature of Table 3 is the survival ratio of ninth grade per 1,000 enrolling in college and its general implications for curriculum development.

PART II

TRENDS: HOLDING POWER AND RELATED DATA

The brief trends data on holding power and graduates in this section, even of short duration, provide useful benchmarks for appraising extent and rate of change in secondary education in Kentucky. Though limited to measures of quantity only, the data provide important indices to aid in high school program evaluation and as a base for further curriculum study.

Indication of Holding Power

As a general measure of holding power, Tables 4, 5, and 6 provide a concise summary of the ten graduating classes of public, non-public, and combined high schools from 1965 to 1974. The majority of graduates of 1974 were enrolled in the first grade in the school year 1962-63--seventh year of the Foundation Program Law of 1956.

Table 4 presents state-wide data for public school districts on survival rates and whereabouts of graduates of public high schools for ten graduating classes, 1965-1974 inclusive. Corresponding data for non-public high schools are presented in Table 5.

Table 6 shows the combined data for all high schools and provides, in terms of enrollment and holding power, a measure of the growth of the total secondary program in Kentucky.

County-Wide Summary Data

By way of a final summary, the three measures used throughout the report--holding power, graduates, and survival rate of ninth grade to college--for public and non-public schools are consolidated into two tables showing relative standings of counties as geographic units in a "standard nine" distribution, (See Tables 7 and 8).

TABLE 4

SUMMARY OF WHEREABOUTS OF GRADUATES OF KENTUCKY PUBLIC HIGH SCHOOLS AND THE SURVIVAL RATE BY CLASSES (GRADES 9-12) FOR THE TEN-YEAR PERIOD, 1965-1974
